Project Experience

PC Palace

Full-Stack web application written using React.js, Next.js, TypeScript, PlanetScale, and Tailwind CSS

- Developed a full-stack e-commerce store using **React.js** and **PlanetScale** as a serverless relational database.
- Implemented **API endpoints** using Next.js API Routes and user authentication with **NextAuth**

ShoppingSquad

Mobile application written using Kotlin and Firebase Realtime Database

- Designed and implemented a friends list within the application that allowed users to view or remove current friends or send friend requests through email using **Firebase Realtime Database** to store relations between friends and friend requests.
- Collaborated with a team of four to design, develop, and produce a dynamic grocery list application.

txt.io

Web application written using React.js, Next.js, TypeScript, MongoDB, and Pusher

- Full-stack messaging application using **Pusher** for real-time updates.
- Includes many features such as group chat, credential authentication using **NextAuth**, and image uploading using **Cloudinary**.

Work Experience

S Phase | Atlanta, Ga

01/2022 – 04/2022

Reconciliation Specialist

- Examined company's accounting records using their software and reviewed them with additional documents from the server folder database to confirm all details are correct.
- Collaborated with different departments to ensure information are correct and updated.

Ethicon | Cornelia, Ga

10/2023 – 01/2024

Braid Utility Floater

- Collaborated in a fast-paced environment within cross-functional departments to ensure the production of medical grade sutures.

Ding Carpool | Remote

12/2024 - Present

Frontend Developer Intern

- Developed the user interface for the mobile application, focusing on core features such as the homepage and tab bar. Implemented intuitive navigation and a visually appealing design to enhance the user experience.
